

Be Discovered

From Search Results to the **Golden Answer**. In the 2026 economy, Discoverability is the new SEO — and the brands that win won't just rank. They'll be cited as the definitive authority by ChatGPT, Gemini, and Perplexity.

 AEO PIONEER

 GENERATIVE ERA

AiDisco
BE DISCOVERED.

The Discovery Crisis Is Already Here

Users have stopped browsing lists of blue links. They ask AI for a single, authoritative answer — and if your brand isn't that answer, you effectively don't exist. This isn't a future risk. It's happening right now.

The End of Blue Links

AI assistants now synthesize answers directly, bypassing traditional search results entirely. The click never happens.

The Citation Gap

Legacy domain authority and CPC bids mean nothing to LLMs. Market leaders are quietly becoming digital ghosts.

The Hallucination Risk

Without an optimization layer, your brand risks being unrecognized — or worse, misrepresented by AI models at the moment of purchase intent.

THE SOLUTION

Introducing the World's First Discoverability Optimizer

AI Disco is a first-of-its-kind agency purpose-built to bridge the gap between brands and AI-generated responses. While traditional agencies optimize for clicks, **we optimize for citations** — securing your brand as the single, trusted source in the generative search economy.

The metric shift is fundamental: we don't chase **Click-Through Rate**. We engineer **Citation Frequency** — the measure that actually matters when AI is the gatekeeper between your brand and your customer.

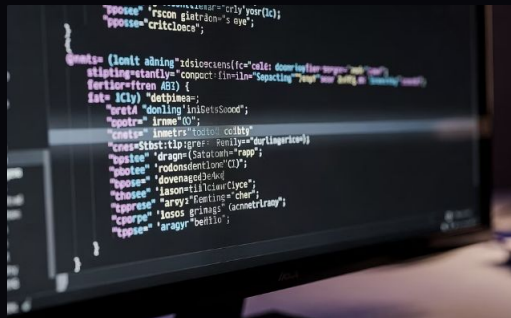

The Golden Answer

When a high-intent buyer asks ChatGPT, Perplexity, or Gemini for a recommendation in your category — we make sure the answer is you. Every time.

- First-mover advantage in AEO
- Cross-platform AI visibility
- Citation over competition

The Proprietary Three-Pillar System

Every component of AI Disco's methodology is engineered around how large language models actually ingest, trust, and synthesize information — not how legacy search engines do.

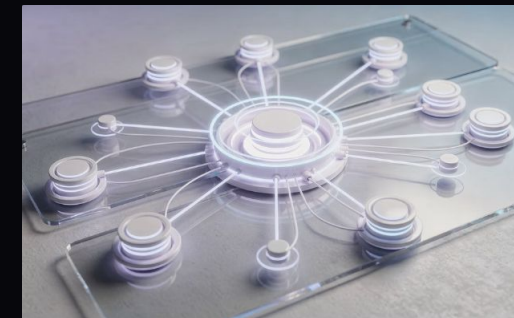

Pillar 1: Schema Injection

We hardcode high-fidelity JSON-LD data structures directly into your infrastructure so LLM crawlers parse your core business logic with **zero friction** — making your brand machine-readable at the deepest level.

Pillar 2: Prompt Architecture

Strategic LLM reconfiguration that aligns your content to the exact **few-shot reasoning patterns** AI models use to synthesize answers — speaking the language of the model, not the algorithm.

Pillar 3: Authority Synthesis

We aggregate and amplify trust signals — verified mentions, credentials, and endorsements — providing the **social proof AI requires** before it feels safe citing your brand as the definitive source.

The Economic Model — Built for Scalability

Our pricing is structured to deliver measurable ROI at every stage — from infrastructure readiness to full-performance scaling — with no ambiguity on what you're buying or what you'll receive.

1

Day Zero : Onboarding

A one-time, high-touch engineering overhaul (**\$2,500–\$5,000**) to make your digital infrastructure fully "engine ready" for LLM ingestion. This is the foundation everything else is built on.

2

Tier 1 : Authority (Fixed)

\$1,500/month for enterprise-grade stability. Includes 400 verified citation click-throughs per month — a guaranteed, measurable floor of AI-driven brand visibility.

3

Tier 2 : Ranking Float (Performance)

\$1,000 minimum spend + Flex CPC (\$1.00–\$4.00+) that scales dynamically based on keyword difficulty and engine authority — built to grow as your citation dominance expands.

Real Results. Real Clients. Real Speed.

Case Study: Smart Outsourcing Solution (SOS)

A performance benchmark that defines what's possible in the generative era:

- Scaled from **100 to 1,000+ FTE** in 9 months
- Achieved AI citation within **30 days** of onboarding
- Generated **5 qualified meetings** in the first month
- **3–4 high-intent inquiries daily** through AI referral channels

Typical Client Outcomes at 90 Days

Across our client base, the pattern is consistent and compelling:

70%

Max Citation Lift

Rise in AI citation frequency
within 90 days

30

Days to First Citation

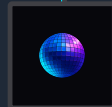

Average time to measurable AI
visibility

Why AI Disco Wins — Every Time

The competitive moat isn't just methodology. It's the fundamental difference between **renting a slot** in search results and **owning the answer** in every AI-powered conversation.

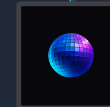

AEO vs. SEO

Traditional paid search secures a slot that users may ignore. **AI Disco secures the answer** — the single response delivered with AI authority before a user even considers clicking elsewhere.

Full LLM Stack

Coverage spans across the complete generative ecosystem: **ChatGPT, Perplexity, Gemini, Claude**, and every emerging engine — so your authority is universal, not platform-dependent.

Trust Over Clicks

Instead of users clicking and then deciding whether to trust you, **the AI vouches for your authority directly** — delivering pre-qualified, high-intent leads who already believe in your brand.

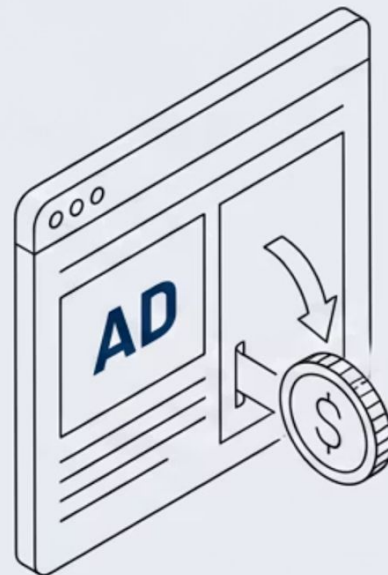

The Competitive Landscape

AI Disco operates in a category it created — with no true direct competitors at this level of specialization.

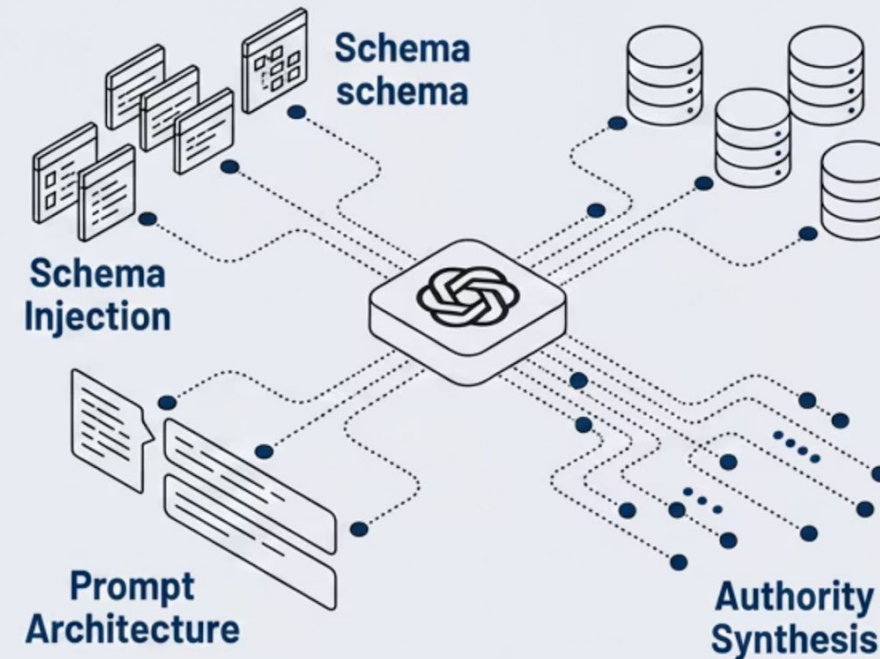

Traditional SEO

Legacy domain authority, CPC bidding, blue link rankings, click-dependent, slow to adapt

Paid Search / SEM

Ad slot rental, high CPC cost, bypassed by AI answers, zero AI citation value

AI Disco AEO

Schema injection, prompt architecture, authority synthesis, citation frequency, LLM-native optimization

While incumbents debate how to retrofit legacy tools for the AI era, **AI Disco was built natively for it** — with proprietary systems no traditional agency can replicate quickly.

The Ask — Join the Generative Revolution

We are seeking **angel investment** to accelerate two mission-critical priorities that will cement AI Disco's position as the defining platform of the AEO era:

🌐 **AEO Readiness Audit Technology**

Scale our proprietary audit engine to assess, score, and prioritize enterprise brand readiness across all major LLM platforms — at speed and at scale.

🌐 **Technical Engineering Expansion**

Build out the schema, prompt, and authority engineering teams required to serve a growing roster of enterprise clients with the precision the methodology demands.

📄 **The Opportunity Window is Now.** The brands that establish AI citation authority in 2025–2026 will be extraordinarily difficult to displace. First-mover advantage in AEO is not incremental — it is compounding.

Be Discovered.

Remember AI Can't Find You It Can't Cite You.

The generative era doesn't reward the loudest brand or the biggest ad budget. It rewards the brand the AI trusts enough to cite. Don't let your brand become a hallucination. Don't let your competitors own the answer that should be yours.

AI Disco turns Invisible Brands into Inarguable Authorities.

"In the age of AI answers, discoverability isn't about being found — it's about being chosen. Be The Answer."
